

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

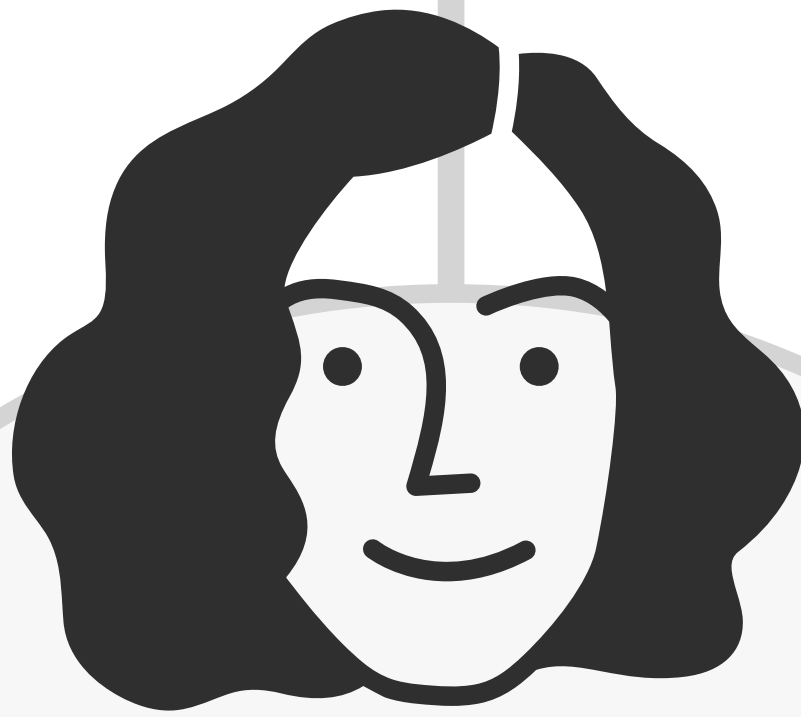

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?

Does

What behavior have we observed?
What can we imagine them doing?

BALA MURUGAN
Unlocking insights into the global air transportation network with tableau

The nodes of network are the airports and the links represent direct flight routes between two airports

Alternatively cities can be considered nodes with links representing direct flight connection between them

Air transport network can be defined worldwide as well as for one region for one air company

The air transportation network is a complex network which has the properties of small world network and scale free network

I think it is useful for high speed air transportation.

Air Transportation is the type of freight capable of travelling long distances in short periods of time.

A process of designing, creating, refining and optimizing an airline's flight schedule to maximize profitability and satisfy traveller demand

The node of the airspace network linking flights for seamless traffic flow.

It also covers route details such as airline sources to destination airports

The air transport system generally includes airports (ATC) (Air Traffic Control) system and airlines.

The extent to which a country's airports are integrated into the global air transport network is also measured

There is less need for heavy packaging but it may be high charge to transport.
